Clark's New-England Bank Note List,

VOL. IX.]

Boston, December 1846.

[NO. 12.

Published Monthly by J. N. BANG, 40 Cornhill, at ONE DOLLAR a year, in advance.

* * * All letters must come post paid, directed to No. 40 Cornhill Boston, which will be promptly attended to.

General Remarks. Money is more in demand than at the close of last month, but the rates continue about the same, first class bills selling at 6 to 8 per cent, and the rates in the street ranging from 8 to 10. Private capitalists prefer to loan on demand rather than to place their funds beyond their control. The amount of bills in the market is very limited, and the supply from the South and West, is unusually small. There is no scarcity of money, and there seems to be nothing but the wants of Government to affect the market unfavorably. The foreign demand for our bread stuffs has greatly added to the wealth of the country, and the low rate at which Exchange rules, will cause specie to come forward. The Banks are in a good condition, and the business community are prudent in their operations. There is little prospect of an immediate termination of the Mexican war, and the great expense which attends it, will furnish the Administration ample scope for the display of its financial talents. The recent loan will soon be absorbed, and if the war continues, a resort must be had to some means beyond the ordinary facilities of Government. The new Tariff comes into operation on the first instant, and for a few weeks the receipts will not fall off, owing to the number of goods which have been kept back to be entered under the new law—but after that time the receipts must be diminished, or our importations must be increased. An expensive war, a sub-treasury, and a low tariff, are formidable experiments; and what the effect will be upon the prosperity of the country, remains to be developed. The great demand, and the high prices which have been obtained for our bread stuffs, have placed the country in a position to meet the operations of any unfavorable policy. The session of Congress is near at hand, and the policy of the Administration with regard to Mexico, will be made public; a better opinion can then be formed with regard to the prospect for the future. The Money Market is usually in a more unsettled state during the session of Congress, and is more or less affected by the frequent panics which arise from the new projects which are brought forward for discussion. Fortunately the session is a short one. The Stock Market exhibits great fluctuations during the past months, and a great falling off in the quotations for Long Island and Norwich and Worcester Railroads, will be observed. The melancholy disaster and loss of the steamer Atlantic, is the cause of the fall in the shares of the last mentioned Stock. We do not learn for a certainty the amount for which the boat was insured, but the loss is severe. A comparison with the quotations for the close of last month, show a decline of over ten dollars per share. The decline in the shares of the Long Island Railroad, is about four dollars. The East Boston Company have declared a dividend of ten dollars, payable in land. The price has not varied much for the last month. The Stock Market exhibits a downward tendency, especially for the description known as fancies. The sound Stocks are generally held for permanent investment, and firm at quotations. In New York the Money Market is about the same as here.
